Lalit Sharma

Data Analyst | SQL | Snowflake | Tableau | Python | Analytics
sh.lalit007@gmail.com | (858) 214-8642 | LinkedIn | Portfolio | GitHub | California, USA

CORE COMPETENCIES

- **Data Analysis & Visualization:** SQL (Snowflake, PostgreSQL, MySQL, SQLite, T-SQL), Tableau, Power BI (DAX, Data Modeling), Looker Studio, Google Sheets (Power Query, Pivot Tables, ARRAYFORMULA), KPI Reporting & Dashboards.
- **Programming & Data Management:** Python (Pandas, NumPy, Statsmodels, Scikit-learn), R, REST APIs, Web Scraping, Git/GitHub, ETL, Data Migration, Data Validation, AWS (S3, RDS).
- **Marketing Analytics:** Google Analytics, Meta Ads Manager & Business Suite, TikTok Ads Manager, Snap Ads Manager, Improvado, Paid & Organic Social Reporting.
- **Business & Systems Analysis:** Requirements Gathering, User Stories, Acceptance Criteria, Process Mapping, Gap Analysis, UAT Support, Stakeholder Collaboration, SDLC (Agile/Scrum), Jira, ClickUp, BPMN.

WORK EXPERIENCE

VaynerMedia **Los Angeles, CA**
Resident Data Analyst, Social Media Analytics Jul 2026 - Oct 2026

- Built client-facing Tableau dashboards and bi-weekly and quarterly reports on Snowflake data, tracking impressions, engagement, CPA and VTA across paid and organic.
- Owned QA of a Snowflake ad data pipeline across 7+ platforms, debugging SQL to fix missing metrics for 600+ assets a month.
- Automated quarterly reporting in Google Sheets from Snowflake (ARRAYFORMULA, XLOOKUP, LET), auto-tagging posts via ClickUp and cutting build time from 40 hours to almost 3 hours.
- Diagnosed ad performance through content analysis, guiding creative decisions that lifted impressions ~30% over benchmarks.
- Analyzed TikTok trends and competitor UGC to turn emerging trends into content ideas for the creative team.

Broswave Technologies Private Limited **San Diego, CA**
Data Analyst (Contract) Jan 2026 - Apr 2026

- Migrated and validated 10+ years of financial and operational data into AWS (S3/RDS), consolidating multiple legacy systems into a centralized cloud database and improving retrieval speed by ~70%.
- Wrote advanced SQL (CTEs, joins, window functions) to clean and normalize inconsistent legacy records into structured tables that streamlined reporting pipeline development by ~50%.
- Developed SOPs, BPMN diagrams, and training docs for 50+ employees transitioning to a centralized cloud system, identifying UX gaps and delivering targeted demos that significantly reduced support queries.
- Built Power BI dashboards using DAX and data modeling to centralize reporting on revenue, operational efficiency, and business performance, reducing manual data retrieval time by ~50%.

Saayam For All **San Jose, CA**
Business Analyst & Team Lead Mar 2025 - Jan 2026

- Built a database of 500+ NGOs by automating data collection via web scraping and REST APIs, saving 35+ hours per cycle and enabling location and service-aware user matching.
- Led end-to-end requirements gathering and implementation coordination for an NGO platform, translating stakeholder vision into use cases and functional specifications across 5 teams, including UX/UI and backend, for the v1.0 release.
- Managed a BA team through weekly syncs, task assignment, and progress tracking.

California State University **Fullerton, CA**
Graduate Researcher (GitHub) Jan 2024 - Jun 2024

- Synthesized 100K+ records across Redfin, US Census, and risk databases, evaluating regression models (OLS, spatial lag, GWR) against prior literature to select the best-fit geospatial predictive model, achieving $R^2 = 0.98$.
- Identified counter-intuitive demand drivers where walkability and school ratings outweighed luxury amenities, validated through feature importance analysis using GeoPandas, Statsmodels, and Tableau.

PROJECTS

The Upscaling Illusion: GPU Value & Pricing Analysis for Nvidia, AMD & Intel (GitHub) Feb 2026 - Apr 2026

- Built a multi-source ETL pipeline merging GPU benchmarks, CPU indices, CPI, and market share into a unified SQLite database, engineering multiple inflation-adjusted Performance-Per-Dollar (PPD) variants.
- Quantified via SQL and Python that nearly 48% of Nvidia's generational PPD gain stems from DLSS & AI frame interpolation, not silicon progress, alongside a 42% real-dollar flagship price increase.

EDUCATION

California State University, Fullerton **Fullerton, CA**
Master of Science in Information Systems Jan 2023 - Jan 2025
Himachal Pradesh Technical University **Hamirpur, India**
Bachelor of Technology in Electronics & Communication Engineering Jul 2018 - May 2022
