Lalit Sharma

Data Analyst | SQL | Power BI | Process Optimization
sh.lalit007@gmail.com | +91 70877-96361 | **LinkedIn** | **Portfolio** | Chandigarh, India

CORE COMPETENCIES

- **Data Analysis & Visualization:** SQL (PostgreSQL, MySQL, SQLite, T-SQL), Power BI (DAX, Data Modeling), Tableau, Looker Studio, Excel (Power Query, Pivot Tables,Advanced Formulas), KPI Reporting & Dashboards.
- **Business & Systems Analysis:** Requirements Gathering, User Stories, Acceptance Criteria, Process Mapping, Gap Analysis, UAT Support, Stakeholder Collaboration, SDLC (Agile/Scrum), Jira, BPMN
- **Programming & Data Management:** Python (Pandas, NumPy, Statsmodels, Scikit-learn), R, REST APIs, Web Scraping, Git/GitHub, ETL, Data Migration, Data Validation, AWS (S3, RDS)

WORK EXPERIENCE

Broswave Technologies Private Limited **San Diego, CA**
Data Analyst (Contract) **Jan 2026 - Apr 2026**

- Migrated and validated 10+ years of financial and operational data into AWS (S3/RDS), consolidating multiple legacy systems into a centralized cloud database and improving retrieval speed by ~70%.
- Wrote advanced SQL (CTEs, joins, window functions) to clean and normalize inconsistent legacy records into structured tables that streamlined reporting pipeline development by ~50%.
- Developed SOPs, BPMN diagrams, and training docs for 50+ employees transitioning to a centralized cloud system, identifying UX gaps and delivering targeted demos that significantly reduced support queries.
- Built Power BI dashboards using DAX and data modeling to centralize reporting on revenue, operational efficiency, and business performance, reducing manual data retrieval time by ~50%.

Saayam For All **San Jose, CA**
Business Analyst & Team Lead **Mar 2025 - Jan 2026**

- Built a database of 500+ NGOs by automating data collection via web scraping and REST APIs, saving 35+ hours per cycle and enabling location and service-aware user matching.
- Led end-to-end requirements gathering and implementation coordination for an NGO platform, translating stakeholder vision into use cases and functional specifications across 5 teams including UX/UI and backend, driving successful v1.0 feature delivery.
- Set up Google Analytics infrastructure and defined KPIs to monitor growth, performance, and donor acquisition.
- Managed a BA team through weekly syncs, task assignment, and progress tracking, ensuring consistent delivery and alignment across ongoing project workstreams.

California State University **Fullerton, CA**
Graduate Researcher Github **Jan 2024 - Jun 2024**

- Synthesized 100K+ records across Redfin, US Census, and risk databases, evaluating regression models (OLS, spatial lag, GWR) against prior literature to select the best-fit geospatial predictive model, achieving $R^2 = 0.98$.
- Identified counter-intuitive demand drivers where walkability and school ratings outweighed luxury amenities, validated through feature importance analysis using GeoPandas, Statsmodels, and Tableau.

Thinknext Technologies Private Limited **Mohali, India**
Data Science Intern **Mar 2022 - Jul 2022**

- Built and evaluated diagnostic models (Decision Trees, ANN) using Scikit-learn on patient symptom and imaging data, improving accuracy from 60% to 80% through K-Fold cross-validation and deployed the final model via Django with a connected front-end interface.

PROJECTS

The Upscaling Illusion: GPU Value & Pricing Analysis for Nvidia, AMD & Intel Github **Feb 2026 - Apr 2026**

- Built a multi-source ETL pipeline merging GPU benchmarks, CPU indices, CPI, and market share into a unified SQLite database, engineering multiple inflation adjusted Performance-Per-Dollar (PPD) variants.
- Quantified via SQL and Python that nearly 48% of Nvidia's generational PPD gain stems from DLSS & AI frame interpolation, not silicon progress, alongside a 42% real dollar flagship price increase.

Crime & Property Dynamics - Boston Housing Analysis (Capstone Project) Github **Jan 2024 - May 2024**

- Orchestrated data cleaning of 800,000+ records using R and Excel, resolving inconsistencies to identify a negative correlation (-0.37) between crime rates and property values across Boston neighborhoods.
- Designed interactive geospatial dashboards in Tableau for real estate investors, visually mapping risk to value ratios to identify high potential investment zones.

EDUCATION

California State University - Fullerton **Fullerton, CA**
Masters in Management Information Systems **Jan 2023 - Jan 2025**
Himachal Pradesh Technical University **Hamirpur, India**
Bachelor of Technology in Electronics and Telecommunication Engineering **Jul 2018 - May 2022**
